SUMMARY

Full-Stack & Mobile Software Engineer with a strong frontend foundation and hands-on experience shipping web and mobile applications across UI, APIs, authentication, databases, and deployment. Proficient in React, Next.js, Angular, and TypeScript. Growing backend ownership with Node.js, Express, MongoDB, PostgreSQL, and Firebase. Mobile experience with React Native, Expo, Flutter, and Jetpack Compose. Comfortable across the full product lifecycle — from translating requirements into interfaces through backend integration, testing, and production deployment.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, SQL, Python, Java, Kotlin, Swift, Bash, HTML5, CSS3/SCSS
Frontend	React.js, Next.js, Angular, Redux, Tailwind CSS, Material UI, shadcn/ui, Bootstrap, WCAG Accessibility
Mobile	React Native, Expo, Flutter, Jetpack Compose, SwiftUI, Android (Kotlin/Java), iOS (Swift)
Backend & APIs	Node.js, Express.js, REST APIs, GraphQL, JWT, OAuth, Apache, Nginx
Databases	MongoDB, PostgreSQL, MySQL, Firebase / Firestore, Redis
Cloud & DevOps	AWS (Cognito, S3, EC2), Vercel, Vercel Blob, Firebase, Docker, GitHub Actions, GitLab CI/CD, Cloudinary
Testing & Tools	Jest, React Testing Library, Postman, Git, Chrome DevTools, Vite, Webpack, Nx Monorepo
Currently Exploring	Spring Boot · Django · Go · Kubernetes · TensorFlow

EXPERIENCE

RenastereDev Canada

May 2025 – Present

Frontend Engineer & Co-Founder

Burnaby, BC

- Architected React and Next.js platforms for multiple Canadian clients, reducing component duplication by ~40% through shared design system libraries.
- Improved Lighthouse performance scores from the 60s to 90+ on 3 client projects through code splitting, lazy loading, and image optimization.
- Cut average CI/CD deployment time by ~30% by introducing standardized pipelines, linting, and automated testing workflows.
- Integrated REST APIs across 5+ client platforms with client-side caching, reducing redundant network requests by over 50%.
- Collaborated directly with clients to translate business requirements into technical specs and shipped features end to end.

HNG Tech

Aug 2024 – Apr 2025

Full Stack Developer

Remote

- Built 4 full-stack MERN applications with end-to-end ownership across React, Node.js, Express, and MongoDB.
- Designed RESTful APIs and JWT authentication flows used across multiple production deployments.
- Built role-based admin dashboards serving internal teams, reducing manual reporting overhead significantly.
- Shipped features across 6-month Agile sprint cycles with daily standups, peer code reviews, and CI/CD deployments.

Remita (Systemspecs)

Mar 2023 – May 2024

Frontend Developer

Lagos, Nigeria

- Built 20+ reusable Angular components and design system primitives for a fintech platform used by thousands of daily users.
- Architected an i18n framework that expanded platform language support from 1 to 4 locales without backend changes.
- Contributed to an Nx monorepo migration that cut build times by ~35% and improved code sharing across 3 product teams.
- Reduced recurring UI bug reports by ~20% through unit testing, code reviews, and component-level QA processes.
- Developed transaction workflows and dashboards handling sensitive financial data under strict security requirements.

RenastereDev

Nov 2021 – Present

Software Developer & Co-Founder

Lagos, Nigeria

- Co-founded a digital media and web development studio that has delivered 15+ production client projects.
- Built client websites, e-commerce platforms, and branding systems using React, Next.js, Node.js, and MongoDB.
- Managed full project lifecycle across 3–5 concurrent engagements — scoping, development, deployment, and support.

jeffersonportfolio-eosin.vercel.app

Huawei

May 2021 – Nov 2021

Software Engineering Intern

Lagos, Nigeria

- Built Python and JavaScript automation tools that reduced repetitive manual workflows for a 10+ person engineering team.
- Debugged enterprise web services and contributed to resolving 15+ production incidents under senior engineer mentorship.
- Completed software testing cycles, QA documentation, and internal technical writing across 2 product teams.

PROJECTS

Curio · Co-Developer Lead

2026

[React Native](#), [Expo](#), [Node.js](#), [Express](#), [MongoDB](#), [JWT](#)

- Built a cross-platform mobile learning app for children with image scanning; led backend and mobile integration as Co-Developer Lead.
- Designed REST APIs connecting React Native clients to Node.js/Express backend, supporting 3 core content delivery workflows.
- Implemented JWT authentication with separate parent and child user flows and session-based access control.
- Diagnosed oversized image payloads causing 3–5s load delays; resolved through client-side compression, cutting scan response time by ~60%.
- Contributed across mobile UI, API design, MongoDB schema design, and Expo deployment pipeline.

ShelfSafe · Full-Stack Developer

2026

[React](#), [Node.js](#), [Express](#), [MongoDB](#), [Vercel Blob Storage](#)

- Built a full-stack inventory and compliance platform with a backend reporting engine using MongoDB aggregation pipelines.
- Implemented PDF and CSV export functionality and real-time analytics dashboards for compliance tracking.
- Diagnosed a critical serverless file download failure on Vercel production; resolved by migrating to Vercel Blob Storage, restoring exports for all users.

StreetReads · Developer Lead

2025

[JavaScript](#), [Firebase](#), [Firestore](#), [TomTom Maps API](#), [Cloudinary](#)

- Led development of a location-based discovery platform with geolocation, reverse geocoding, and proximity-based ranking.
- Migrated proximity logic from Google Maps to TomTom Maps API, improving nearest-location accuracy and reducing API costs.
- Integrated Cloudinary for media storage, image optimization, and CDN delivery across all user-generated content.

EDUCATION

Langara College

2025 – 2026

Post-Degree Diploma · Web & Mobile Application Development

Covenant University

2017 – 2022

B.Eng. · Electrical & Electronics Engineering

CERTIFICATIONS

- ALX Software Engineering
- Responsive Web Design
- Engineering Project Management
- JavaScript Algorithms & Data Structures
- Google Crash Course on Python
- Introduction to Cybersecurity
