## PROFESSIONAL SUMMARY

Full-Stack & Mobile Software Engineer with 4+ years of experience building production web and mobile applications across frontend, backend, APIs, databases, authentication, and cloud deployment. Strong foundation in React, Next.js, Angular, and TypeScript, with growing full-stack ownership across Node.js, Express, MongoDB, PostgreSQL, and Firebase, as well as mobile development with React Native, Flutter, Jetpack Compose, and Swift. Experienced in taking products from requirements and interface development through backend integration, testing, deployment, and production troubleshooting. Experienced collaborating across teams and building reliable software across web and mobile platforms.

## SELECTED ENGINEERING HIGHLIGHTS

- ◆ **Full-Stack:** Designed REST APIs, authentication flows, database models, reporting systems, and frontend integrations across Node.js/Express applications.
- ◆ **Mobile:** Built cross-platform mobile experiences with React Native/Expo, camera functionality, API communication, and image-processing workflows.
- ◆ **Cloud:** Deployed and troubleshoot applications across Vercel, AWS (Cognito, S3, EC2), Firebase, and Docker-based environments.
- ◆ **Product Engineering:** Experience moving features from requirements and UI implementation through backend integration, testing, and deployment.

## TECHNICAL SKILLS

|                    |                                                                                                                                                     |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Languages          | JavaScript (ES6+), TypeScript, SQL, Python, Java, Kotlin, Swift, Bash, HTML5, CSS3 (SCSS/Sass)                                                      |
| Frontend           | React.js, Next.js, Angular, Redux, Context API, React Hooks, Tailwind CSS, Material UI, shadcn/ui, Bootstrap, Responsive Design, WCAG Accessibility |
| Mobile             | React Native, Expo, Flutter, Jetpack Compose, SwiftUI, Android (Kotlin/Java), iOS (Swift)                                                           |
| Backend & APIs     | Node.js, Express.js, REST APIs, GraphQL, JWT Authentication, AWS Cognito, OAuth, Microservices, Apache, Nginx                                       |
| Databases          | PostgreSQL, MongoDB, MySQL, Firebase Firestore, Redis                                                                                               |
| Cloud & DevOps     | AWS (Cognito, S3, EC2), Vercel, Vercel Blob Storage, Firebase Hosting, Docker, GitHub Actions, GitLab CI/CD, Cloudinary                             |
| Testing & Tools    | Jest, React Testing Library, Postman, Git, Chrome DevTools, Vite, Webpack, npm, Yarn, Nx Monorepo                                                   |
| Architecture       | System Design, API Design, Component Architecture, Authentication & Security, Performance Optimization, Scalability, Code Review                    |
| Currently Learning | Spring Boot · Django · Go · Kubernetes · TensorFlow                                                                                                 |

## PROFESSIONAL EXPERIENCE

### RenastereDev Canada · Senior Frontend Engineer

May 2025 – Present

- ◆ Lead frontend architecture decisions for scalable, production-grade React and Next.js platforms serving multiple clients.
- ◆ Built and maintained reusable component libraries and design systems improving consistency and developer experience.
- ◆ Improved application performance meaningfully through code splitting, lazy loading, memoization, and Core Web Vitals optimization.
- ◆ Reduced development cycle time by introducing standardized templates, linting, and automated CI/CD pipelines.
- ◆ Optimized REST API integration workflows, error handling, and client-side caching strategies.
- ★ **Growth Impact: Transitioned into engineering leadership, mentorship, and architecture-level decision-making.**

## HNG Tech · Full Stack Developer

Aug 2024 – Apr 2025

- ◆ Built full-stack MERN applications using React, Node.js, Express.js, and MongoDB with end-to-end feature ownership.
- ◆ Developed RESTful APIs, JWT authentication flows, and backend business logic for production applications.
- ◆ Built admin dashboards, analytics interfaces, and internal tools with role-based access control.
- ◆ Participated in Agile sprint planning, daily stand-ups, code reviews, and CI/CD-based deployments.
- ◆ Improved feature delivery velocity through reusable components and modular architecture.

★ **Growth Impact:** Expanded backend ownership, full-stack confidence, and team-based engineering delivery.

## Remita · Frontend Developer

Mar 2023 – May 2024

- ◆ Built reusable Angular components and design system primitives for fintech applications serving thousands of daily users.
- ◆ Developed transaction processing workflows and dashboard interfaces with security best practices for sensitive financial data.
- ◆ Integrated REST APIs with backend engineers, ensuring data integrity and low-latency response times.
- ◆ Architected i18n framework supporting multiple languages and locale-specific formatting at scale.
- ◆ Contributed to Nx monorepo migration, improving build performance and dependency management across teams.
- ◆ Significantly reduced recurring UI bugs through unit testing, code reviews, and component-level QA.

★ **Growth Impact:** Mastered enterprise-scale engineering practices, code governance, and production reliability.

## RenastereDev · Co-Founder / Lead Product Engineer

Nov 2021 – Present

- ◆ Architected and delivered 15+ production websites, branding systems, and e-commerce platforms using React, Next.js, Node.js, and MongoDB.
- ◆ Led client discovery sessions and translated business requirements into scalable technical solutions and product roadmaps.
- ◆ Managed end-to-end project lifecycle including client communication, sprint planning, deployment, and post-launch support.
- ◆ Established repeatable engineering workflows and CI/CD pipelines that significantly reduced delivery bottlenecks.

★ **Growth Impact:** Developed entrepreneurial leadership and full ownership of product, engineering, and stakeholder management.

## Huawei · Software Engineering Intern

May 2021 – Nov 2021

- ◆ Developed internal automation tools using JavaScript and Python, improving team workflow efficiency.
- ◆ Debugged enterprise-grade applications and resolved critical production issues across web services.
- ◆ Executed software testing, QA workflows, and authored technical documentation for engineering processes.

★ **Growth Impact:** Built foundational software engineering discipline and exposure to enterprise SDLC.

## MAJOR PROJECTS + CHALLENGES SOLVED

### Curio · Co-Developer Lead · Full-Stack Mobile Learning Application

2026

- ◆ Built a cross-platform mobile learning experience using React Native/Expo with a Node.js/Express backend and MongoDB data layer.
- ◆ Developed REST API workflows connecting mobile clients with backend services and image-based learning functionality.
- ◆ Integrated camera and image processing workflows allowing children to scan real-world objects and receive educational content.
- ◆ Implemented secure authentication and protected application flows for parent and child experiences using JWT-based authentication.
- ◆ Contributed across mobile UI, API integration, backend services, database models, debugging, and deployment.
- ◆ Challenge: Large image payloads degrading app performance. Solution: Identified image size as the real bottleneck and introduced compression and optimization rather than unnecessary infrastructure complexity.

github.com/jeffersonuo-dev · linkedin.com/in/jeffersonuo-dev · jeffersonportfolio-eosin.vercel.app

## ShelfSafe · Full-Stack Web Application

2026

- ◆ Built full-stack inventory and compliance platform using React, Node.js, Express.js, and MongoDB.
- ◆ Designed scalable backend reporting architecture with optimized database queries and aggregation pipelines.
- ◆ Implemented PDF and CSV export functionality alongside real-time analytics dashboards for compliance tracking.
- ◆ Significantly reduced report generation time via async processing and query optimization.
- ◆ Challenge: Reports failed to download on Vercel-hosted production. Solution: Integrated Vercel Blob Storage to enable reliable file generation and download in serverless environments.

## StreetReads · Developer Lead · Location Discovery Platform

2025

- ◆ Built location-based discovery platform using JavaScript, Firebase, Firestore, TomTom Maps, Cloudinary, and Geolocation APIs.
- ◆ Designed geolocation workflows including reverse geocoding, distance calculation, and proximity-based recommendations.
- ◆ Challenge: Reliable image and file storage. Solution: Integrated Cloudinary for cloud-based media storage, optimization, and CDN delivery.
- ◆ Challenge: Google Maps API limitations and cost. Solution: Migrated to TomTom Maps API to compute and display the two nearest location boxes accurately.

## EDUCATION

### Langara College · Post-Degree Diploma, Web & Mobile Application Development

2025 – 2026

- ◆ Formal training in full-stack web and mobile development, databases, software engineering methodologies, and Canadian tech standards.
- ◆ Strengthened system design thinking and bridged self-taught engineering instincts with academic rigour.
- ★ **Growth Impact: Accelerated Canadian market readiness and reinforced professional engineering foundations.**

### Covenant University · B.Eng. Electrical & Electronics Engineering

2017 – 2022

- ◆ Built analytical and systems thinking through hardware, circuit design, and engineering mathematics.
- ◆ Strong foundation in problem-solving, technical documentation, and cross-functional collaboration.
- ★ **Growth Impact: Established the logical foundation that underpins all technical and product decisions.**

## CERTIFICATIONS & CONTINUOUS LEARNING

- |                                  |                                           |
|----------------------------------|-------------------------------------------|
| ◆ ALX Software Engineering       | ◆ JavaScript Algorithms & Data Structures |
| ◆ Google Crash Course on Python  | ◆ Responsive Web Design                   |
| ◆ Engineering Project Management | ◆ Technical Writing                       |
| ◆ Introduction to Cybersecurity  |                                           |

## LEADERSHIP & COMMUNITY IMPACT

- ◆ Led RenastereDev teams across multiple concurrent client projects.
- ◆ Taught teenagers tech career pathways and introduced coding fundamentals.
- ◆ Supported NGO initiatives through pro-bono digital work.
- ◆ Participated in Colorado innovation exchanges.
